

Kuala Lumpur City Center Park

Malaysia

In front of KLCC lies a beautifully designed plaza with aesthetic water features that blend seamlessly with the iconic landmark. To support both surface water management and the water feature system, ACO supplied a comprehensive drainage solution—including standard systems for walkways and custom-designed grates.

These custom grates feature the Islamic star motif, a subtle yet powerful nod to Malaysian cultural identity. This project reflects how thoughtful design and functionality can come together—showcasing national spirit even in the smallest architectural details.
